

In order to be part of the European Games (and maybe the European Championships, as mentioned in press release sent by Joachim about : ‘European Sports Championships’) its necessary for JJEU to have a decent ranking method. From each participating class the numbers 1 till 8 are invited to participate at the games. For getting this list clear and open its a must to have some well thought ranking methods.

We prepared a proposal for this list:

Ranking Method

The following JJEU events will counted for the JJEU European Ranking List

- Continental Championships (like Ech and EOCh)
- Grand Slam(A-Class)Tournaments
- B tournaments (local organised under auspicien of a Continental A referee)

Total Points:

All achieved Points in the Ranking Events of JJEU

Qualification:

Addition of only the best result of each qualifying group: Continental Championship/ Grand Slam Tournaments/B class tournament

The JJEU board can determine different qualification periods if necessary

EEC fee is for the Top-European athletes (Number 1 of each category and weight class) and the best Nation.

They will receive a awards - the ECC Trophy.

Each year! From 1.1. til 31.12. The award will be presented at the next European Championship.

If we get an agreement with EOC about this proposal for ranking the best 8 athletes of each category we need to administrate this 100% correct. So organizations need to send results in 2 weeks after finalizing their tournament.

Actuality

The points will reduce after...

- 12 month to 75 %
- 18 month to 50 %
- 24 month to 10 %

ECC A class tournaments are like: German Open, Paris Open, Dutch Open, Balkan Open, St. Petersburg Open for 2017 and 2018 these are. All these tournaments are counted for the European Ranking list.

B class tournaments having a JJEU lable which are classified as a B level tournament. This lable will be given by JJEU board.

Only 2 of these B level tournaments are counted for the ranking list (best results)

Only 3 (best) results of ECC tournaments will be used in the ranking list.

All results of EOch and ECh will be used for calculation.
